EDUCATION

La Salle University

B.S. Computer Science, Mathematics Minor; GPA: 3.99/4; summa cum laude

Philadelphia, USA

Aug. 2024 – May 2026

University of Tulsa

B.S. Computer Science (Transferred)

Tulsa, USA

Aug. 2022 – May 2024

EXPERIENCE

Cook / Facilities Assistant

La Salle University Christian Brothers

2025-2026

Philadelphia, USA

- Cooked meals for the Christian Brothers community on Campus
- Helped out with odd-jobs around their residence. Setting up guest rooms, clearing out basement etc.

NCAA D1 Track & XC Athlete

University of Tulsa & La Salle University

2022-2026

Tulsa, OK & Philadelphia, PA

- Competed as an NCAA Division I Track & Cross Country athlete whilst Studying Computer Science.
- Collaborated within high-performance team environments to achieve collective goals.

Waterways Labourer

CityCare Water

2021

Christchurch, NZ

- Worked as a labourer doing contract work for the city council during a gap year
- Physical labour in the waterways of the city protecting the local ecosystem
- Learnt about the expectations of a workplace, and managing personalities while working as a team

PROJECTS

SleeveMap | [Link](#) | *Next.js, React, Supabase/PostgreSQL, Strava API, HTML, CSS, TypeScript, SQL*

- Built a full-stack activity mapping site using the Strava API via OAuth 2.0, pulling thousands of activities and storing them using PostgreSQL through Supabase
- Implemented a real-time webhook pipeline to automatically ingest new Strava activities without user intervention
- Built a public profile system with row-level privacy controls, allowing users to share interactive maps at a public URL with no authentication required
- Developed a route planning tool with snap-to-road routing (Mapbox Directions API), GPX export, and collaborative heatmap overlays for planning routes with friends
- Deployed on Vercel with a Supabase backend, handling authentication via secure httpOnly cookies and token refresh logic

Group Project: Mjolnir | [GitHub](#) | *Next.js 14, React 18, TypeScript, Tailwind CSS, Google Cloud Storage / BigQuery*

- Collaborated in an agile student engineering group to design and build a centralized log observation and analysis platform
- Simulated three sprint cycles where we needed to display our progress and completed/incomplete stories
- Pulled thousands of data entries from Google's BigQuery and developed interactive analytics dashboards with ApexCharts, enabling real-time visual assessments of log anomalousness
- Implemented AI powered anomaly suggestions utilising Google Gemini's API

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks / Libraries: Next.js, React, .Net Core MVC, Bootstrap, Tailwind

Developer Tools: Git, Docker, Postman, Vercel, Supabase
